Vehicle Security

Long-term parking is available at many of the trailheads as shown on the reverse of this brochure. If you plan to leave your vehicle overnight or longer in Fort Meade Recreation Area, Bear Butte State Park, or Wind Cave National Park, please notify a ranger. Doing this will let park managers know why a vehicle has been left at a trailhead.

Campfires

Open fires are not permitted. An "open fire" is defined as any fire burning slash, brush, grass, stubble, debris, rubbish, or other inflammable material not enclosed in a stove, spark-proof incinerator, or an established fireplace approved or constructed by public agencies in designated recreation areas. Campfire grates are provided in many campgrounds for campground users.

The Centennial Trail has been developed for you to enjoy. Please help us keep the Trail clear of trash by packing out all of your litter and food residue. When camping, use minimum impact techniques and practice Leave No Trace ethics. If using a motorized vehicle on the Trail where permitted, TREAD LIGHTLY and protect the environment you enjoy. When meeting other parties on the Trail, allow room to pass. Horse riders will require extra space. Bikes yield to hikers;

Feedback

hikers yield to horses.

We need your comments on your Centennial Trail experience. Did you find the trail signing adequate? Were the facilities along the Trail adequate? Were you able to find enough information to plan your trip? Please send any comments you may have to the supervisor of any agency listed on this brochure.

Trail Maps

This Trail is shown in detail on two different Trails Illustrated maps which are available for approximately \$9.95*. The Black Hills National Forest visitor map can be purchased from any of the agencies listed for approximately \$7.49*. This map provides information about road access to the trailheads. *Prices are subject to change.

Introduction

Marking the 100th anniversary of statehood, 1889 to 1989, the 111-mile Centennial Trail represents the diversity of South Dakota. The Trail crosses the prairie grasslands near Bear Butte State Park and climbs into the Black Hills high country, skirting lakes and streams until it reaches Wind Cave National Park near Hot Springs. The Forest Service, Bureau of Land Management, National Park Service, and South Dakota Department of Game, Fish and Parks have combined their efforts to develop this Trail for you to enjoy.

Allowed Trail Uses By Management Agency

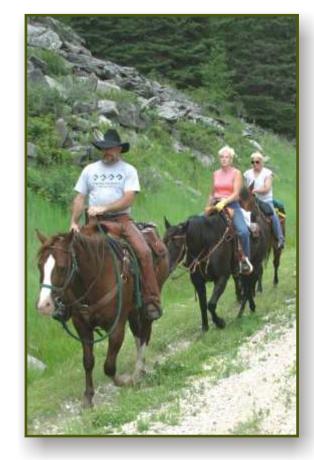

- *Motorized use of the Centennial Trail is allowed only on some portions of the Trail between Pilot Knob Trailhead and Dalton Trailhead. Use alternate routes as signed.
- **Horse and mountain bike use is not allowed in the eastern portion of Bear Butte State Park. Along the Trail several short stretches are designated for hiker use only. Bypass routes are signed for other trail user types.

Trip Planning

Planning will help you enjoy your trip on the Centennial Trail. Find out as much as you can about the area where you plan to use the Trail. Drinking water is not readily available along the Trail. Many of the streams dry up in early summer. Protect yourself and treat raw water taken from streams and lakes before you drink it. Many of the established campgrounds and picnic areas along the Trail have drinking water during the summer months of June, July, and August. During the rest of the year, campground water systems are turned off. Be prepared for unexpected changes in the weather, and for emergencies. Food is not readily available along the Trail. Food may be obtained from stores in the Black Hills area.

Permits, Fees, and Camping

Many of the campgrounds along the Trail charge a fee. Some campgrounds also require a reservation ahead of time. The facility list on the reverse of this brochure indicates which facilities require a use fee and reservation.

Black Elk Wilderness portion of the Trail requires free registration for anyone using the Wilderness. This registration form describes the rules and regulations of the Black Elk Wilderness and are available at Wilderness Trailheads. Bicycles are not allowed in the Wilderness.

Custer State Park requires the purchase of a park entrance license for vehicles to use the Park. Annual and temporary permits are available. No permit is required to hike or bike through Custer State Park. Within Custer State Park, camping is only allowed in developed campgrounds, except in the French Creek Natural Area where camping is allowed anywhere along the trail.

Wind Cave National Park requires a free backcountry permit for those who plan to camp in the backcountry. This permit describes requirements which must be followed when camping in the backcountry of Wind Cave National Park. Permits are available at Wind Cave National Park trailheads. Bicycles are not allowed off designated roads.

Bear Butte - Centennial Trail begins in the north at the top of Bear Butte. At 4,422 feet, Bear Butte is a sacred place for the American Indian. The butte is a laccolith formed by a molten magma intrusion that has been exposed by erosion of the surrounding prairie lands.

Wildlife - The Black Hills area provides habitat for many wildlife species. You might see antelope, bighorn sheep, mule deer, white-tailed deer, elk, turkeys, or mountain goats. There are about 370 miles of trout fishery streams in the Black Hills. The Centennial Trail crosses a number of these streams.

Bighorn sheep

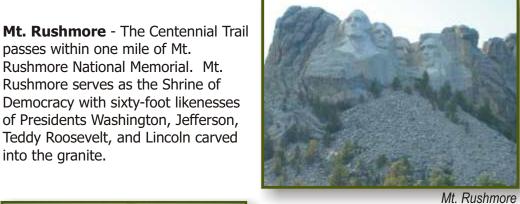

Lakes and Reservoirs - The Centennial Trail passes by or near seven bodies of water, each with its own special character. Sheridan Lake and Pactola Reservoir are popular recreation spots for boating, fishing and swimming. Trout fishing is especially popular. Most lakes are stocked with fish by the South Dakota Department of Game, Fish and Parks.

Black Hills rock formations

Geology - Black Hills geology is very complex. The Hills were formed by the uplifting of the earth's crust millions of years ago. Precambrian rock formations, consisting of slate, schist and granite, form a central core. Harney Peak at 7,242 feet and the nearby Needles are part of this core. Surrounding the central core are rings of sedimentary rocks consisting of sandstone, limestone, and shale in which occur many well-known caves, such as Wind Cave and Jewel Cave.

American Bison (Buffalo) - Buffalo herds roam Custer State Park and Wind

Cave National Park. They are exciting

to watch, but can be dangerous and unpredictable if approached. View from

passes within one mile of Mt. Rushmore National Memorial. Mt. Rushmore serves as the Shrine of Democracy with sixty-foot likenesses of Presidents Washington, Jefferson, Teddy Roosevelt, and Lincoln carved into the granite.

Buffalo shedding its winter coat

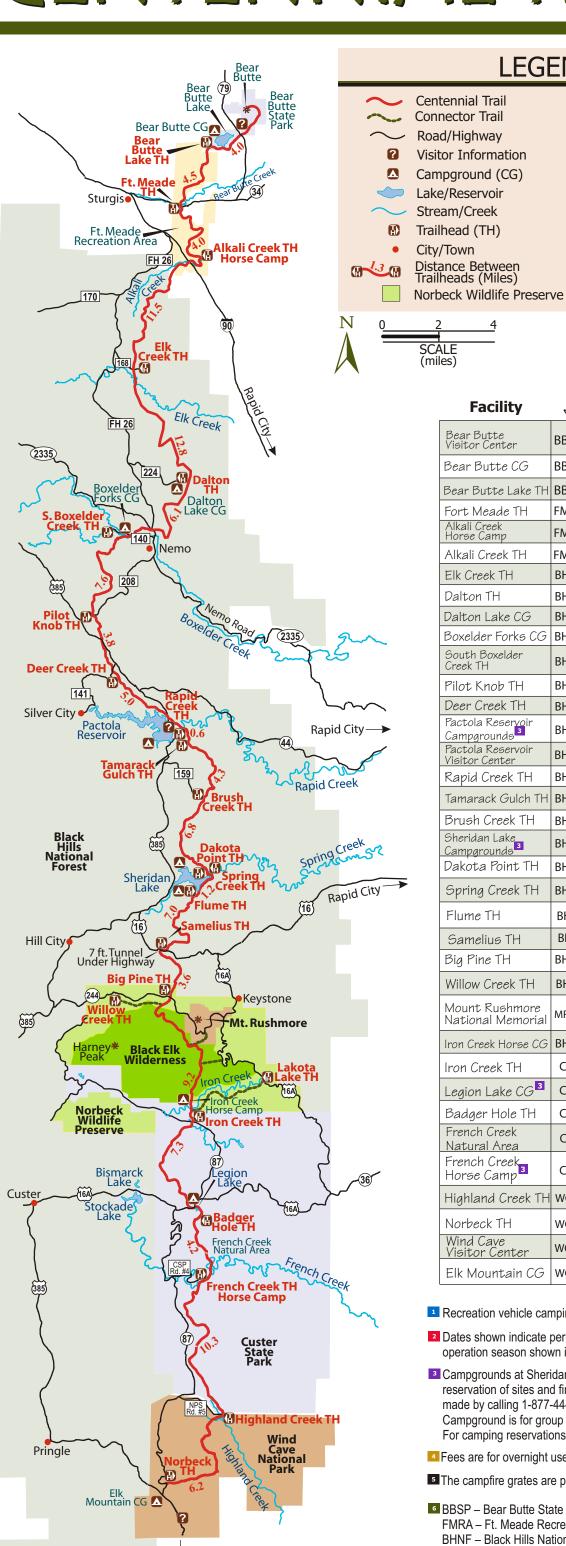

History - The Black Hills are rich in both American Indian and early American history. Archeological evidence suggests American Indian use of the area began about 10,000 years ago. The first expedition to explore the Black Hills was Custer's Expedition

a safe distance.

Custer and his officers

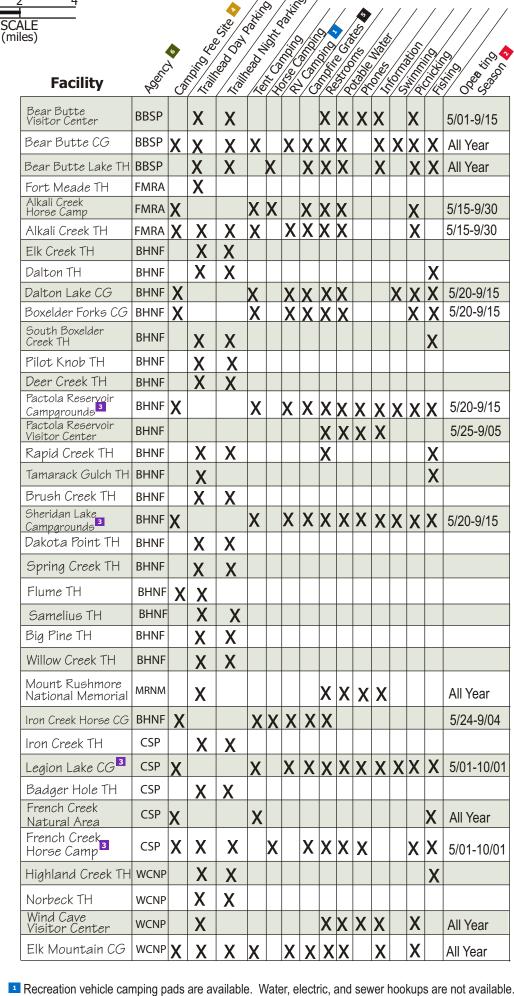

♥Hot Springs

The Centennial Trail number "89" got its number from the date of South Dakota's statehood, 1889.

- 2 Dates shown indicate period of year when facilities such as the water system are in operation. The operation season shown is approximate and may vary a week or two on each end of the season.
- Campgrounds at Sheridan Lake, Pactola Reservoir, Iron Creek Horse Camp provide for both reservation of sites and first come-first served basis. Reservations at these campgrounds can be made by calling 1-877-444-6777 or online at www.reserveUSA.com. A portion of Sheridan Lake Campground is for group camping only. Some camping supplies and food is available at the marinas. For camping reservations in Custer State Park call 1-800-710-2267.
- Fees are for overnight use of these facilities.
- The campfire grates are provided for your safety. Open fires are prohibited.
