

GAME, FISH AND PARKS COMMISSION ACTION PROPOSAL

Application for License Chapter 41:06:01

Commission Meeting Dates:	Proposal	March 3-4, 2022	Pierre
	Public Hearing	May 5, 2022	Custer State Park
	Finalization	May 5-6, 2022	Custer State Park

COMMISSION PROPOSAL

Proposed changes from last year:

1. Remove the requirement for unlimited access permits for archery, muzzleloader, mentor, youth, and apprentice deer license holders to hunt certain deer hunting units and public lands.
2. Limit the number of archery access permits for Unit WRD-27L to no more than 20 "any deer" access permits for residents and no more than 5 "any deer" access permits for nonresidents.

SUPPORTIVE INFORMATION

Research on R3 efforts (i.e., Recruitment, Reactivation, Retention) has identified rule/regulation complexity to be one of several obstacles for new sportsmen and women. The removal of these access permits will greatly simplify hunting regulations regarding mentor, archery, muzzleloader, youth, and apprentice deer license holders while having no impact to deer management in these areas. The number of access permits currently available, across all of these seasons, has created unnecessary complexity for sportsmen and women as well as the administration of these access permits in the licensing system.

Unlimited access permits were established with the intent to evaluate harvest and participation on specific management areas by deer hunters with statewide or region-wide (e.g., West River Archery Deer) license types including archery, muzzleloader, mentor, youth, and apprentice license types. Deer harvest and participation was evaluated on all areas that required an access permit in 2019 and results were presented to the Commission. As a result, the Commission took action to limit archery deer access permits to 500 residents and 125 nonresidents on management unit 35L and no other unlimited license types or access permit areas were limited. Since 2019, no changes have been made to the number of access permits available for archery deer hunters in management unit 35L and no further changes have been made to the unlimited access permit areas.

Through the 2021 deer hunting season, hunting effort and harvest success by access permit users has been collected, providing sufficient baseline information regarding use on these areas. Harvest and success by hunters with statewide or region-wide license types will continue to be estimated at the firearm deer management unit level. In the event there is a desire to consider limiting access permits on additional areas and user groups, harvest and success data will be used to evaluate use by user groups on these areas beginning the 2022 deer hunting season.

This change will simplify deer hunting regulations for statewide and region-wide deer license type user groups and reduce complexity of the deer licensing system.

Limited access units (LAUs) are intended to reduce hunter densities and provide a quality hunt experience. Trend data of supports limiting the number of resident and nonresident archery access permits for Unit WRD-27L to help meet its LAU objective. In addition, a reduction in archery deer harvest will help meet the 80% firearm hunter success goal identified in the deer management plan for LAUs.

DRAFT ADMINISTRATIVE RULE CHANGES

The following are proposed draft changes that are intended to incorporate the recommended changes adopted by the Commission.

41:06:01:17. Access permits required for specific deer hunting units and public lands. Any resident or nonresident deer hunter possessing an archery, muzzleloader, apprentice hunter, youth, or mentor deer license shall obtain and possess a free limited access permit to hunt certain hunting units or public lands described in § 41:06:22:01. West River deer units 24B, 27L, 35L, and East River deer unit 13L. Any resident or nonresident deer hunter possessing an archery deer license shall obtain and possess a free access permit in order to hunt Newton Hills State Park or in the Black Hills as defined in § 41:06:19:02. Unlimited access permits may be issued for each management unit and each free access permit shall be unit specific.

41:06:22:01. Archery deer hunting season established -- Number and type of licenses -- Access permits. The archery deer hunting season is open statewide from one-half hour before sunrise to one-half hour after sunset each day beginning September 1 through January 1, except as otherwise provided in § 41:06:22:02. Unlimited "any deer" licenses may be issued for units ARD-ST1, ARD-ER1, and ARD-WR1 and unlimited antlerless whitetail deer licenses may be issued for unit ARD-LM1. One thousand single-tag "any antlerless deer" licenses may be issued for use in ARD-MP1, ARD-MP2 and ARD-MP3. No more than ten "any deer" and 50 antlerless whitetail deer access permits may be issued to residents for Adams Homestead and Nature Preserve. No more than ten "any deer" and 25 "antlerless whitetail deer" access permits may be issued to residents for Good Earth State Park. No more than 500 "any deer" access permits may be issued to residents and no more than 125 "any deer" access permits may be issued to nonresidents for unit WRD-35L described in § 41:06:20:02. No more than 20 "any deer" access permits may be issued to residents and no more than 5 "any deer" access permits may be issued to nonresidents for unit WRD-27L described in § 41:06:20:02.

RESIDENT/NONRESIDENT CRITERIA

1. The Issue
 - Unlimited access permits were originally used to monitor deer hunter numbers and success on specific management units. Adequate data have been obtained to evaluate hunter numbers and harvest on these areas, and future monitoring can be obtained via harvest estimates and success without the need for unlimited access permits.
2. Historical Considerations
 - Data regarding unlimited access permit use and harvest success were evaluated in 2019 and changes were made to limit archery hunters in deer management unit 35L.
3. Biological Considerations
 - Harvest estimates at the firearm deer management unit will continue to be estimated by deer hunters with statewide and region-wide license types and these data are used to evaluate biological impact of harvest to the deer population.
4. Social Considerations
 - Hunter density and harvest by hunters with statewide and region-wide license types will continue to be monitored to estimate and evaluate social considerations, such as perceived hunter density and crowding.
5. Financial considerations
 - Access permits are available at no cost, so there is no financial consideration.

RECRUITMENT, RETENTION, REACTIVATION (R3) CRITERIA

1. Does the regulation or fee inhibit a user's ability to participate? No.
2. Does the regulation increase the opportunity for new and existing users?
 - No, the access permits were free and unlimited, so the removal of these permits will have no effect on opportunity.
3. How does the regulation impact the next generation of hunters, anglers, trappers, and outdoor recreationists?
 - The regulation will simplify hunting requirements for deer hunter license types including archery, muzzleloader, mentor, youth, and apprentice.
4. Does the regulation enhance the quality of life for current and future generations by getting families outdoors? Not applicable.

FISCAL IMPACT

No fiscal impact as all access permits are issued free of charge.
