  - i. Those cervid carcasses taken from a known South Dakota CWD endemic area that test negative for CWD from a verified test sponsored by the Department would be exempt from this disposal regulation.
  - ii. Any recipient of such gift of wildlife as described above shall follow this cervid carcass disposal requirement.
- B. A wildlife processing facility as defined by 41:06:03:10 shall dispose of all remaining cervid carcass parts taken from another state, regardless of CWD status of the exporting state, or a known South Dakota CWD endemic area with a waste management provider or permitted landfill.

SUPPORTIVE INFORMATION

Chronic wasting disease (CWD) poses serious challenges to wildlife managers and the implications of long-term sustainability and management for free-ranging deer and elk could be significant. The known CWD endemic area is currently restricted to southwestern South Dakota and includes the counties of Custer, Fall River, Lawrence and Pennington counties. CWD has been confirmed in deer within the Black Hills (Firearm Units BD1 and BD2), Custer State Park and Prairie Units 02A, 21A, 21B, 27A, 27B and 27L. CWD has been confirmed in elk within the Black Hills (Firearm Units H2, H3, H4, H5, H7 and H9), Custer State Park and Prairie Unit 27A.

Chronic wasting disease can be spread among cervids by both direct contact between animals and exposure to environments contaminated with CWD prions, the abnormal protein that causes the disease. The unnatural dispersal of CWD-infected cervid carcasses from the location of harvest within a known CWD endemic area to places such as a hunter's home, taxidermist or game processor in a portion of the state not known to have CWD, is a significant concern. Since there is currently no known cure for CWD, proactive actions that include preventive measures to reduce the unnatural spread of CWD are a high priority.

The goal state of the South Dakota Chronic Wasting Disease Action Plan is to determine presence/absence of CWD, reduce the spread of CWD, and have an informed public that understand, support and participate with CWD management practices to ensure viable deer and elk populations for future generations. The above recommendations have been identified as new rules for consideration within the action plan to reduce the spread of CWD through the proper disposal of carcass remains.

**41:06:04:03. Methods prohibited.** A person may not establish, utilize, or maintain a bait station from August 15 to February 1, inclusive, and from March 15 to May 31, inclusive, to attract any big game animal, including wild turkey, and a person may not use an electronic call when hunting any big game animal except a mountain lion. A bait station is a location where grains, fruits, vegetables, nuts, hay, minerals, or any other natural food materials, commercial products containing natural food materials, or by-products of such materials are placed or maintained as an attractant to big game animals for the purpose of hunting. The use of scents alone does not constitute a bait station.

This section does not apply to foods that have not been placed or gathered by a person and result from normal environmental conditions or accepted farming, forest management, wildlife food plantings, orchard management, or similar land management activities.

A person is exempt from the bait station restrictions while participating in any research or depredation management activities directed by the department.

SUPPORTIVE INFORMATION

As a result of the September 1 start date for archery deer hunting, this change is being recommended to adjust the time period when baiting is prohibited.
